Body paragraphs

1

Supporting evidence

Body paragraphs provide evidence and analysis to convince your reader of your argument.

2

Focus on a single idea

Each body paragraph should focus on a **single** idea, using topic sentences, supporting evidence, and explanations to connect your points back to your thesis.

3

Develop and support your thesis

Body paragraphs are the heart of your essay. They develop and support your thesis statement.

4

Each paragraph should be linked to the one before it with transitional devices such as:

- repeating key words/synonyms
- transitional words/phrases.

Concluding Paragraph

It is the **final** paragraph in an essay. It has **three** purposes:

1. It signals the end of the essay. To do so, begin with a transition signal (ex. in conclusion, to conclude, to summarize, etc…).

2. It reminds your reader of your **main points**, you can do this either by:

- **Summarizing your subtopics**/ major ideas (body paragraphs' topic sentences). **OR**
- **Paraphrasing** your thesis statement.

Concluding Paragraph

3. It leaves your reader with **your final thoughts/opinion** on the topic.

- This is your opportunity to **convey a strong, effective message** that your reader will remember.

Concluding Paragraph

Techniques that you can use to write a memorable conclusion:

1. **Making a prediction**

2. **Suggesting results or consequences**

3. **Suggesting a solution, making a recommendation, or a call for action**

4. **Quoting an authority on the topic**

Note: You can use more than one method within the same concluding paragraph.

1. Making a prediction

A conclusion that ends with a **prediction** wrapping up the main points of the writing and then looks forward to what might happen in the future based on the information discussed.

Example

In conclusion, it is obvious that technology has changed how we communicate, learn, and have fun in big ways. From the internet to smart devices, these changes have brought us closer and created new opportunities. As we look to the future, it seems likely that technology will keep advancing quickly, possibly bringing even more surprising changes. The future of technology promises to be both exciting and full of surprises.

2. Suggesting results or consequences

A conclusion that sums up the main ideas and then explains what will likely happen because of them. It shows **the effects** or **outcomes** of the topic discussed.

Example

In summary, the advancements we've seen in renewable energy technologies have significantly reduced our reliance on fossil fuels and lowered greenhouse gas emissions. These changes are helping to combat climate change and protect our environment. As we continue to invest in and develop these technologies, we can expect even greater improvements in energy efficiency and sustainability. If these trends continue, we may see a future where clean energy is the norm, leading to healthier ecosystems and a more stable climate for generations to come.

3. Suggesting a solution, making a recommendation, or a call for action

It is a conclusion that wraps up what has been previously said and then suggests what should be done next. It provides a **clear solution to a problem**, **offers advice on what actions to take**, or **encourages readers to act in a certain way**.

Example

In conclusion, while climate change presents significant challenges, there are clear steps we can take to address it effectively. By increasing our investment in renewable energy, improving energy efficiency, and supporting policies aimed at reducing carbon emissions, we can make a substantial impact. It is crucial for individuals, businesses, and governments to work together to implement these solutions. Taking these actions now will help protect our planet for future generations and ensure a more sustainable and healthier world.

4. Quoting an authority on the topic

A conclusion that ends with quoting an authority finishes by including **a quote from an expert** on the topic. This helps to **strengthen the argument** and add **credibility** by showing that a knowledgeable person agrees with the points made.

Example

In conclusion, while the benefits of regular exercise are clear, it is important to remember the advice of fitness expert Dr. Jane Smith, who says, "Exercise is not just about adding years to your life but adding life to your years." Embracing a consistent workout routine not only improves physical health but also enhances overall well-being. By following this expert advice, we can make meaningful changes that contribute to a healthier, more fulfilling life.

Practice

State the technique used in the following concluding paragraphs.

To sum up, the costs of attending college are up and financial aid for students is down. Fewer and fewer future members of the workforce are able to educate themselves beyond high school. As a result, the nation will waste the intelligence, imagination, and energy of a large segment of the present college-age generation.

Suggesting results of consequences

Practice

State the technique used in the following concluding paragraphs.

We have seen how the costs of attending college have been rising while, at the same time, sources of financial aid for students have been disappearing. If this trend continues, fewer and fewer families will be able to send their children through four years of college.

Making a prediction

Practice

State the technique used in the following concluding paragraphs.

In conclusion, costs are rising and financial aid is declining, with the result that many can no longer afford to go to college. If our nation is to prosper, increased government funding for education is essential, even if it requires higher taxes. As Horace Mann[1] argued in his *Fifth Annual Report*, a nation's economic wealth will increase through an educated public. It is therefore in the self-interest of business to pay the taxation for public education.

Quoting an authority

Practice

State the technique used in the following concluding paragraphs.

It is clear that the U.S. system of higher education is in trouble. For many students, completing four years of college is no longer possible because of increasing costs and decreasing financial aid. To reverse this trend, we must demand that government increase its financial support of colleges and universities and restore financial aid programs. Our future depends on it.
